Hi Scott,

Attached is a link to the San Diego County Planning Commission staff report:

<http://www.avcaptureall.com/Sessions.aspx#mode.upcoming&session.ac6ec916-0232-428d-a0a5-691179f4350c>

On the left hand side you'll find an attached document titled Staff Report - Soitec Solar Development.pdf. Go ahead and download the document. The decision with the conditions of approval is one of the attachments (likely C or D) of the document. You'll find pre-construction, construction, and post-construction conditions.

Otherwise, we are updating our website for the final EIR with the Jacumba GW Investigation, Rugged GW Investigation and all of the GMMPs. It should be updated as early as the next hour. I would have e-mailed you when it was accomplished but I'm taking off early today.

If you have any questions, please let me know and I'll respond on Monday.

Have a great weekend.

Subject: Soitec updated GRIRs and GMMPs

Good morning Jim,

Hopefully you are rested after last night's BPG meeting.

I wanted to confirm a couple of things with you before sending in comments. Can you confirm that the GRIRs and GMMPs for TDS, Rugged, JCSD, and PVMWC are all current on the Soitec EIR page on the County's website? The reason I ask is that, as an example, I do not see Jacumba Solar mentioned in the JCSD GRIR, and I do see a reduction in storage down to 52% for Scenario 3 of the JCSD GRIR. Both of these items I mentioned last night and your responses were yes, Jacumba Solar was included in the analysis and no, there was no reduction in storage down to 52%. So I just want to be

sure there are not revised GRIRs or GMMPs by Dudek that I am missing. I'd hate to provide comments on out of date reports or information.

Thanks in advance.
